Getting Started

See the [Project Contributor Wiki](https://wiki.acumos.org) for an intro to many aspects of the infrastructure and community practices as proposed to be used in Acumos. See the [Communication](https://wiki.acumos.org) page for info on mailing lists and IRC channels. Questions about using Acumos should be posted to [Stack Overflow](https://stackoverflow.com) or one of the Acumos mailing lists.

- **Need to create a bug report?** Read the [bug report guidelines](https://wiki.acumos.org) and then create a bug in [Jira](https://wiki.acumos.org) (you must log in with your Linux Foundation ID).
- **Want to look at user stories** planned for a release? Head over to [Jira](https://wiki.acumos.org).
- **Want to review code patches?** Take a look at how to do [Code Reviews](https://wiki.acumos.org) and then you can start reviewing code in [Gerrit](https://wiki.acumos.org) (Linux Foundation ID required to log in)

Using Acumos

- **User Guides** on the [Acumos Platform Documentation](https://wiki.acumos.org) site

Setting Up Acumos

- **Zero-to-Acumos (z2a) Guide**
- **Portal and Marketplace Admin Guide**
- **Operator Guides**

Developing Acumos

- **Platform Architecture Guide**
- **Component Guides**
- **Project Contributor Wiki**
- **Code Walkthrus**

Acumos Community

- **Code of Conduct**
- **Acumos Events**
- **Community Tools & Project Infrastructure**
- **Acumos Documentation Project**
